National Motoric Improvement Centre for Children and Youth

Xál,

Thank you so much for your letter and the background information concerning the development of the National Motoric Improvement Center for Children and Youth in Budapest.

This is indeed a wonderful outcome to many years of undoubted hard work and drive from yourself and your team. It is heart warming to recognise that there are persons such as yourself around the world who dedicate their lives to help others not so fortunate.

If I do find myself in Hungary this coming year I will endeavour to find time to visit the school complex and witness the conclusion to a lifetimes work.

Yours sincerely

Sir Philip Craven MBE
